Richard Ernst 先生 ご逝去

日本核磁気共鳴学会長 池上貴久

Richard Ernst 博士（1991 年、ノーベル化学賞）におかれましては、病氣療養中のところ先週 6/4（金）にご逝去されました。とり急ぎ、お知らせいたします。

ご冥福を心よりお祈り申し上げます。

以下に AMPERE MAGNETIC RESONANCE mailing list でのお知らせを転送させていただきます。

Dear Colleagues,

it is my sad duty to inform you that Richard Ernst, Nobel Prize in Chemistry 1991, passed away last Friday in his care home in Winterthur after a long illness.

We have lost one of the pioneers that shaped the development of magnetic resonance. Richard developed many of the concepts and tools that we use in NMR and MRI today. He was not only a great scientist but also a patient teacher for his students with many other interests besides science. He was well known for his collection of Tibetan Thangkas (wall paintings), his interest in Tibetan culture, and for his love of classical music.

We will miss him and always remember him.

The memorial service is planned for Friday 18.6.2021 3pm in the protestant city church in Winterthur. More details and the address for condolence letters can be found at:

Rest in peace, Richard!

Matthias
